WEBINAR

ITALIANI ALL'ESTERO

The Italian Parkinson's and Movement Disorders Society/LIMPE-DISMOV has scheduled a series of Webinars starting on 28 September involving Italian neurologists living abroad in order to consolidate relations, create scientific collaborations to stimulate, especially young people, to gain experience also in foreign centres dealing with movement disorders by strengthening scientific collaborations and exchanges for Fellowships of young researchers between Italian and foreign centres.

Wednesday, JANUARY 31, 2024

5.00pm/6.00pm

Subthalamic nucleus stimulation in Parkinson's disease: lessons from our patients

Chairman: *M. Sensi* (Ferrara, Italy)

Speaker: *A. Castrioto* (Grenoble, France)

Since 1993, subthalamic nucleus stimulation has become a mainstay in the treatment of motor fluctuations in Parkinson's disease. In this journey from the dawn of deep brain stimulation, we will discuss not only the motor benefit provided by subthalamic nucleus stimulation, but also the importance of a correct balance between dopaminergic medication and stimulation in order to achieve a satisfactory management of neuropsychiatric symptoms. We will go over the concept of dopaminergic sensitization, with potential positive and negative consequences.

FREE REGISTRATION AT WWW.FADLIMPE.IT

PROVIDER N. 175
EVENT N. 403834

Training objective

Clinical documentation.
Clinical and care pathways, diagnostic and
rehabilitation pathways, care profiles

Italian CME Credits: 1,5
